

Receive Cash Incentives for Installing High Efficiency Equipment!!

Duke Energy is rolling out a
new Energy Efficient program!

If you are anticipating building a new facility or simply remodeling an existing one, there are incentives that can help your business offset the cost to purchase high efficiency equipment. High efficiency equipment such as, lighting, HVAC, motors, VFD's or pumps will reduce your energy usage and cut your operating expenses.

To Qualify:

- Be a Duke Energy commercial or industrial retail electric customer not on rate TS (Service at Transmission Voltage)
- Submit an application **within 90 days** after new equipment is installed and operational
- Minimum of 1800 hours annually

For more information please go to the Duke energy website, <http://www.duke-energy.com>, there you will find more Information on the programs and downloadable application forms. Contact Rick Mack at (513) 621-9050 to find out if your company is eligible today!!

Are you tired of AB being your only Automation Choice? If so, CBT can now offer you a new line; **ABB**

ABB is a global leader in power and automation technologies that enable utility and industry customers to improve their performance while lowering environmental impact. They offer the complete automation package including, but not limited to:
